TECHNOLOGY: The harvest takes place manually in September / October with mixed red berried grapes at the maximum chemical / organoleptic balance followed by a short maceration in the press and subsequent soft pressing, followed by the static decantation of the must. Its primary fermentation takes place in steel containers at 18/19 ° C with selected yeasts. The new wine is kept on the "noble lees" for months, then clarified and racked into autoclaves for the second fermentation. The refermentation takes place at 16/18 ° C always with selected yeasts and lasts about 25/30 days. The wine is then bottled and left to rest in the bottle for a few weeks.

ORGANOLEPTIC FEATURES:

Perlage: fine and continuous

Color: deep rosé with ruby red reflections

Bouquet: fruity of strawberry and cherry

Taste: a pleasant sweet acid contrast
